

**Bid price includes:**

- planting Twelve (12) 5-6' white spruce, Seven (7) 7-8' Colorado Blue spruce trees, for a total of nineteen (19) live trees planted. Trees will be planted in good practice with a minimum of 3" brown or black hardwood bark mulch to match existing landscaping. Screened topsoil will be placed around the root ball and tamped to insure root health. In addition to topsoil, trees will be given milorganite fertilizer as requested and a compost mixture will be added to topsoil.
- Trees will be staked for support with three (3) cedar stakes per plant. Guy wire will have environmentally friendly brace to protect the trunk of the tree from stunted growth.
- Sod to be restored to pre-work condition, including grading disturbed topsoil or adding additional topsoil to amend ruts or displaced turf.

Compact Equipment will be minimal impact and in good mechanical condition and appearance.

All work will be done in a safe and timely manner.
